Art Unit: 1651

1. Receipt is acknowledged of the prior art information disclosure statement filed October 05, 2001.

2. Claims 1-30 are present in this application.

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-9, drawn to a reaction mixture comprising a prokaryotic S-30 extract combined with a supplemental mix containing buffer, salts, nucleotide triphosphates, energy generating system or source, and amino acids, classified in class 530, numerous subclasses depending upon the extract and the source.

Claim 10 is unsearchable due to the lack of sufficient information as to the mix as well as the extract

II Claims 11-22, as drawn to an article which is drawn to a fractionated E. coli S-30 reaction mixture which is composed of the combined constituents of an S-30 extract and a supplemental mix with a container, classified in Class 435, subclass 810. Both the extract as well as the mix are completely inadequate for a proper search and examination.

Art Unit: 1651

III. Claims 23-26, drawn to a method of making a reaction mixture for conducting a protein synthesis reaction in a prokaryotic cell free extract, classified in class 435, subclass one plus depending upon the energy generating system.

IV. Claims 27-30, drawn to a method for performing protein synthesis reaction, classified in Class 530, subclass one plus.

4. The inventions are distinct, each from the other because:

Each of the above groups are separate and patentably distinct from each other as drawn to different ingredients or mixtures. Invention II is drawn to a fractionated E. coli mixture whereas Invention I does not contain a fractionated E. coli mixture. Invention III is not the same scope as Invention I since it lacks amino acids and contains PEG. Invention IV process is drawn to a different reaction from that of Invention I.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their recognized divergent subject matter and the search required for one invention is not required for the other invention, thusly the restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Lilling whose telephone number is (703) 308-2034 and fax number is (703) 308-4242 or SPE Michael Wityshyn whose telephone number is (703) 308-4743. Examiner can be reached Monday-Thursday from about 5:30 A.M. to about 3:00 P.M. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.
